Release Notes

Date: October 14, 2024
Version: 1.9.1

Summary

1.9.1 is a new software release for Teal 2. This update is for the AV only; it is not for the GCS.

Improved Features

2.1 Bug Fix Related to TAC Display of Drone Battery Life

A bug was identified that affects a small subset of Teal 2 batteries and that can result in the drone battery charge percentage being displayed on the TAC as N/A.
This bug only affects a small subset of Teal 2 batteries that are currently in the field. The update should be considered non-critical unless a battery charge level of N/A has been experienced or Teal Customer Service have notified you that your fleet is affected.
